

Report on our trip to an exhibition in the Hamburg history museum

On February 3rd, 2023 around noon our class 8c visited the Hamburg history museum to explore the exhibition *'Eine Stadt wird bunt'*.

This trip took place because there was a competition at our school and our classroom was needed for it.

The exhibition is divided into two sections: one is about the introduction and the other about everything else.

The topic is graffiti and hiphop culture from in Hamburg in the 1980s and 1990s.

Also, there is some vintage clothing you can see, like an adidas suit, but all these sections focus on art and the past.

The museum shows different paintings and designs of the artists. In addition, there are not only pictures but also books, movies, clothes, touchscreens and music related to the subject.

We think that *'Eine Stadt wird bunt'* is definitely worth a visit because of the variation and creativity shown in the exhibition. The mix of history and the art of graffiti is very attractive for people who have both these interests. It shows how the different subcultures have evolved throughout the ages and it truly is worth a visit.
